

weekdate calendar: Making Scheduling a Breeze

This unique, patent-pending calendar lets you pencil things in on the spot. WeekDate offers a new choice for calendar users who prefer to have everything written down on paper. It allows you to record daily, weekly, monthly and annual events easily without the fear of losing it all. The WeekDate planning system is the brainchild of artist Kay Odell, owner of Kodell Art, LLC. Kay specializes in whimsical art and dog commissions, and you can choose from her eight colorful and fun original designs to personalize your WeekDate cover. Enclosed in a protective plastic cover, they are available at www.weekdate.com for \$29.95 plus shipping and handling. WeekDate is a perfect gift for the holidays, unique and different while practical and portable.

WeekDate allows you to easily record a recurring event, yet you **ONLY WRITE IT ONCE**. The top flap of the calendar is visible above the current week and offers space to write set activities for each four or five weeks of the month. Below the current week is space to add weekly fixed activities. Each week begins with Monday in order to keep weekend activities recorded together. Once the week is finished, the spiral-bound calendar easily reveals the next week's schedule of appointments and events, including the recurring activities that are above and below the spiral-bound portion.
